

The figure displays a 10x10 grid of 100 small plots. Each plot contains a set of vertical bars, colored either blue or green. The bars are arranged in various patterns across the grid, representing different data points or categories. The patterns vary significantly from one plot to another, with some plots showing a single bar and others showing multiple bars of different heights and positions. The overall layout is a structured grid, with each plot occupying a specific row and column position.
