## django-modeladmin-reorder

---

Custom ordering for the apps and models in the admin app. You can also rename, cross link or exclude models from the app list.

### 1.1 Features

- Reorder apps in admin index - this will allow you to position most used apps in top of the page, instead of listing apps alphabetically. e.g. `sites` app before the `auth` app
- Rename app labels easily for third party apps without having to modify the source code. e.g. rename `auth` app to `Authorisation` for the django admin app.
- Split large apps into smaller groups of models.
- Reorder models within an app. e.g. `auth.User` model before the `auth.Group` model.
- Exclude any of the models from the app list. e.g. Exclude `auth.Group` from the app list. Please note this only excludes the model from the app list and it doesn't protect it from access via url.
- Cross link models from multiple apps. e.g. Add `sites.Site` model to the `auth` app.
- Rename individual models in the app list. e.g. rename `auth.User` from `User` to `Staff`

### 1.2 Documentation

The full documentation is at <https://django-modeladmin-reorder.readthedocs.org>.

### 1.3 Install

Install `django-modeladmin-reorder`:

```
pip install django-modeladmin-reorder
```

### 1.4 Configuration

1. Add `admin_reorder` to `INSTALLED_APPS`:

```
INSTALLED_APPS = (  
    ...  
    'admin_reorder',  
    ...  
)
```

### 2. Add the *ModelAdminReorder* to *MIDDLEWARE\_CLASSES*:

```
MIDDLEWARE_CLASSES = (  
    ...  
    'admin_reorder.middleware.ModelAdminReorder',  
    ...  
)
```

### 3. Add the setting *ADMIN\_REORDER* to your settings.py:

```
ADMIN_REORDER = (  
    # Keep original label and models  
    'sites',  
  
    # Rename app  
    {'app': 'auth', 'label': 'Authorisation'},  
  
    # Reorder app models  
    {'app': 'auth', 'models': ('auth.User', 'auth.Group')},  
  
    # Exclude models  
    {'app': 'auth', 'models': ('auth.User', )},  
  
    # Cross-linked models  
    {'app': 'auth', 'models': ('auth.User', 'sites.Site')},  
  
    # models with custom name  
    {'app': 'auth', 'models': (  
        'auth.Group',  
        {'model': 'auth.User', 'label': 'Staff'},  
    )},  
)
```

---

## Installation

---

At the command line:

```
$ easy_install django-modeladmin-reorder
```

Or, if you have virtualenvwrapper installed:

```
$ mkvirtualenv django-modeladmin-reorder  
$ pip install django-modeladmin-reorder
```

---

## Usage

---

1. Add *admin\_reorder* to *INSTALLED\_APPS*:

```
INSTALLED_APPS = (  
    ...  
    'admin_reorder',  
    ...  
)
```

2. Add the *ModelAdminReorder* to *MIDDLEWARE\_CLASSES*:

```
MIDDLEWARE_CLASSES = (  
    ...  
    'admin_reorder.middleware.ModelAdminReorder',  
    ...  
)
```

3. Add the setting *ADMIN\_REORDER* to your settings.py:

```
ADMIN_REORDER = (  
    # Keep original label and models  
    'sites',  
  
    # Rename app  
    {'app': 'auth', 'label': 'Authorisation'},  
  
    # Reorder app models  
    {'app': 'auth', 'models': ('auth.User', 'auth.Group')},  
  
    # Cross-linked models  
    {'app': 'auth', 'models': ('auth.User', 'sites.Site')},  
  
    # models with custom name  
    {'app': 'auth', 'models': (  
        'auth.Group',  
        {'model': 'auth.User', 'label': 'Staff'},  
    )},  
)
```

---

## Contributing

---

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given.

You can contribute in many ways:

### 4.1 Types of Contributions

#### 4.1.1 Report Bugs

Report bugs at <https://github.com/mishbahr/django-modeladmin-reorder/issues>.

If you are reporting a bug, please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

#### 4.1.2 Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with “bug” is open to whoever wants to implement it.

#### 4.1.3 Implement Features

Look through the GitHub issues for features. Anything tagged with “feature” is open to whoever wants to implement it.

#### 4.1.4 Write Documentation

django-modeladmin-reorder could always use more documentation, whether as part of the official django-modeladmin-reorder docs, in docstrings, or even on the web in blog posts, articles, and such.

#### 4.1.5 Submit Feedback

The best way to send feedback is to file an issue at <https://github.com/mishbahr/django-modeladmin-reorder/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome :)

## 4.2 Get Started!

Ready to contribute? Here's how to set up *django-modeladmin-reorder* for local development.

1. Fork the *django-modeladmin-reorder* repo on GitHub.
2. Clone your fork locally:

```
$ git clone git@github.com:your_name_here/django-modeladmin-reorder.git
```

3. Install your local copy into a virtualenv. Assuming you have *virtualenvwrapper* installed, this is how you set up your fork for local development:

```
$ mkvirtualenv django-modeladmin-reorder
$ cd django-modeladmin-reorder/
$ python setup.py develop
```

4. Create a branch for local development:

```
$ git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

5. When you're done making changes, check that your changes pass *flake8* and the tests, including testing other Python versions with *tox*:

```
$ flake8 admin_reorder tests
$ python setup.py test
$ tox
```

To get *flake8* and *tox*, just *pip* install them into your virtualenv.

6. Commit your changes and push your branch to GitHub:

```
$ git add .
$ git commit -m "Your detailed description of your changes."
$ git push origin name-of-your-bugfix-or-feature
```

7. Submit a pull request through the GitHub website.

## 4.3 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

1. The pull request should include tests.
2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function with a docstring, and add the feature to the list in *README.rst*.
3. The pull request should work for Python 2.6, 2.7, and 3.3, and for PyPy. Check [https://travis-ci.org/mishbahr/django-modeladmin-reorder/pull\\_requests](https://travis-ci.org/mishbahr/django-modeladmin-reorder/pull_requests) and make sure that the tests pass for all supported Python versions.

## 4.4 Tips

To run a subset of tests:

```
$ python -m unittest tests.test_admin_reorder
```

**Credits**

---

## 5.1 Development Lead

- Mishbah Razzaque <mishbahx@gmail.com>

## 5.2 Contributors

- zhangkaizhao - <zhangkaizhao@gmail.com>
