3.1	Release 1.0	7
3.2	0.x	7

django fields to get and store webcam snaphot

- fully compatible with Django FileField protocol
- Supports gif/jpeg/png
- Manage multiple fields in the same page
- Works in the admin as any other field (need `import webcam.admin` to configure `FORMFIELD_FOR_DBFIELD_DEFAULTS`)

Note: based on jquery.webcam plugin from Robert Eisele (robert@xarg.org)

CHAPTER 1

Examples

models.py:

```
import webcam.admin # needed to show the right widget in the admin
from django.db import models
from webcam.fields import CameraField

class Person(models.Model):
    picture = CameraField()
```
