
Elma Python Library

Release

May 25, 2015

1	elma package	1
1.1	Submodules	1
1.2	elma.constants module	1
1.3	elma.models module	1
1.4	elma.packing module	5
1.5	elma.utils module	6
1.6	Module contents	6
	Python Module Index	7

1.1 Submodules

1.2 elma.constants module

1.3 elma.models module

class `elma.models.Event`

Bases: `object`

Abstract base representation of a single replay event.

time

float

The time at which the event occurs, given in 625/273ths of a second.

class `elma.models.Frame`

Bases: `object`

Represent a single replay frame. .. attribute:: position

Point

The position of the kuski in this frame in level coordinates.

left_wheel_position

Point

The position of the bike's left wheel in this frame relative to the position of the kuski.

right_wheel_position

Point

The position of the bike's right wheel in this frame relative to the position of the kuski.

head_position

point

The position of the kuski's head in this frame relative to the position of the kuski.

rotation

int

The rotation of the kuski in 10000ths of a radian.

left_wheel_rotation

int

The rotation of the bike's left wheel in $249/2/\pi$ -ths of a radian.

right_wheel_rotation

int

The rotation of the bike's right wheel in $249/2/\pi$ -ths of a radian.

is_gasing

boolean

Whether or not the bike is gasing in this frame.

is_turned_right

boolean

Whether or not the bike is turned right in this frame.

spring_sound_effect_volume

int

The spring sound effect volume for this frame.

class `elma.models.GroundTouchAEvent`

Bases: `elma.models.Event`

Represent a single replay ground touch A event.

class `elma.models.GroundTouchBEvent`

Bases: `elma.models.Event`

Represent a single replay ground touch B event.

class `elma.models.LeftVoltEvent`

Bases: `elma.models.Event`

Represent a single replay left volt event.

class `elma.models.Level`

Bases: `object`

Represent an Elastomania level.

polygons

list

A list of Polygons in the level.

objects

list

A list of Objects in the level.

pictures

list

A list of Pictures in the level.

level_id

int

A unique unsigned 32bit integer level identifier.

name*string*

The name of level, which should be no longer than 50 characters long.

lgr*string*

The name of the LGR used for this level, which should be no longer than 10 characters long.

ground_texture*string*

The name of the ground texture used for this level, which should be no longer than 10 characters long.

sky_texture*string*

The name of the sky texture used for this level, which should be no longer than 10 characters long.

class `elma.models.Obj` (*point, type, gravity=0, animation_number=1*)

Bases: `object`

Represent an Elastomania level object, which can be one of: flower, food, killer, start.

point*Point*

The 2D Point that represents the position of the object. `type (int)`: The type of the object, which should be one of: `Obj.FLOWER`, `Obj.FOOD`, `Obj.Killer`, `Obj.START`.

gravity*int*

The gravity of the object, if the object is a food object. It should be one of: `Obj.GRAVITY_NORMAL`, `Obj.GRAVITY_UP`, `Obj.GRAVITY_DOWN`, `Obj.GRAVITY_LEFT`, `Obj.GRAVITY_RIGHT`.

animation_number*int*

The animation number of the object.

FLOWER = 1**FOOD = 2****GRAVITY_DOWN = 2****GRAVITY_LEFT = 3****GRAVITY_NORMAL = 0****GRAVITY_RIGHT = 4****GRAVITY_UP = 1****KILLER = 3****START = 4**

class `elma.models.ObjectTouchEvent`

Bases: `elma.models.Event`

Represent a single replay object touch event.

class `elma.models.Picture` (*point*, *picture_name*='', *texture_name*='', *mask_name*='', *distance*=500, *clipping*=0)

Bases: `object`

Represents an Elastomania level picture.

point

Point

The 2D Point that represents the position of the object.

picture_name

string

The name of the picture resource to use, without .PCX, e.g. 'BARREL'.

texture_name

string

The name of the texture resource to use, without .PCX, e.g. 'STONE1'.

mask_name

string

The name of the texture resource to use, without .PCX, e.g. 'MASKHOR'.

distance

int

The z-ordering distance of the picture. Should be in the range 1-999.

clipping

int

The clipping of the picture. Should be one of: `Picture.CLIPPING_U`, `Picture.CLIPPING_G`, `Picture.CLIPPING_S`.

CLIPPING_G = 1

CLIPPING_S = 2

CLIPPING_U = 0

class `elma.models.Point` (*x*, *y*)

Bases: `object`

Represent a single 2D point.

x

float

The x-coordinate of the point.

y

float

The y-coordinate of the point.

class `elma.models.Polygon` (*points*, *grass*=False)

Bases: `object`

Represents an Elastomania level polygon.

points

list

A list of Points defining the polygon contour.

grass*boolean*

A boolean deciding whether or the polygon is a grass polygon.

class `elma.models.Replay`Bases: `object`

Represent an Elastomania replay.

is_multi*boolean*

Whether or not the replay is a multiplayer replay.

is_flagtag*boolean*

Whether or not the replay is a flagtag replay.

level_id*int*

The unique identifier of the level this replay is from.

level_name*string*

The name of the level this replay is from.

frames*list*

The frames of this replay.

events*list*

The events of this replay.

get_exact_duration_in_seconds()

Calculates the exact replay duration in seconds.

class `elma.models.RightVoltEvent`Bases: `elma.models.Event`

Represent a single replay right volt event.

class `elma.models.TurnEvent`Bases: `elma.models.Event`

Represent a single replay turn event.

1.4 elma.packing module

`elma.packing.pack_level(item)`

Pack a level-related item to its binary representation readable by Elastomania.

`elma.packing.pack_replay(item)`

Pack a replay-related item to its binary representation readable by Elastomania.

`elma.packing.unpack_level(data)`

Unpack a level-related item from its binary representation readable by Elastomania.

`elma.packing.unpack_replay` (*data*)

Unpack a replay-related item from its binary representation readable by Elastomania.

1.5 elma.utils module

`elma.utils.null_padded` (*string*, *length*)

Force a string to a given length by right-padding it with zero-bytes, clipping the initial string if necessary.

1.6 Module contents

e

elma, 6
elma.constants, 1
elma.models, 1
elma.packing, 5
elma.utils, 6

A

animation_number (elma.models.Obj attribute), 3

C

clipping (elma.models.Picture attribute), 4
CLIPPING_G (elma.models.Picture attribute), 4
CLIPPING_S (elma.models.Picture attribute), 4
CLIPPING_U (elma.models.Picture attribute), 4

D

distance (elma.models.Picture attribute), 4

E

elma (module), 6
elma.constants (module), 1
elma.models (module), 1
elma.packing (module), 5
elma.utils (module), 6
Event (class in elma.models), 1
events (elma.models.Replay attribute), 5

F

FLOWER (elma.models.Obj attribute), 3
FOOD (elma.models.Obj attribute), 3
Frame (class in elma.models), 1
frames (elma.models.Replay attribute), 5

G

get_exact_duration_in_seconds() (elma.models.Replay method), 5
grass (elma.models.Polygon attribute), 4
gravity (elma.models.Obj attribute), 3
GRAVITY_DOWN (elma.models.Obj attribute), 3
GRAVITY_LEFT (elma.models.Obj attribute), 3
GRAVITY_NORMAL (elma.models.Obj attribute), 3
GRAVITY_RIGHT (elma.models.Obj attribute), 3
GRAVITY_UP (elma.models.Obj attribute), 3
ground_texture (elma.models.Level attribute), 3
GroundTouchAEvent (class in elma.models), 2
GroundTouchBEvent (class in elma.models), 2

H

head_position (elma.models.Frame attribute), 1

I

is_flagtag (elma.models.Replay attribute), 5
is_gasing (elma.models.Frame attribute), 2
is_multi (elma.models.Replay attribute), 5
is_turned_right (elma.models.Frame attribute), 2

K

KILLER (elma.models.Obj attribute), 3

L

left_wheel_position (elma.models.Frame attribute), 1
left_wheel_rotation (elma.models.Frame attribute), 1
LeftVoltEvent (class in elma.models), 2
Level (class in elma.models), 2
level_id (elma.models.Level attribute), 2
level_id (elma.models.Replay attribute), 5
level_name (elma.models.Replay attribute), 5
lgr (elma.models.Level attribute), 3

M

mask_name (elma.models.Picture attribute), 4

N

name (elma.models.Level attribute), 2
null_padded() (in module elma.utils), 6

O

Obj (class in elma.models), 3
objects (elma.models.Level attribute), 2
ObjectTouchEvent (class in elma.models), 3

P

pack_level() (in module elma.packing), 5
pack_replay() (in module elma.packing), 5
Picture (class in elma.models), 3
picture_name (elma.models.Picture attribute), 4

pictures (elma.models.Level attribute), 2
Point (class in elma.models), 4
point (elma.models.Obj attribute), 3
point (elma.models.Picture attribute), 4
points (elma.models.Polygon attribute), 4
Polygon (class in elma.models), 4
polygons (elma.models.Level attribute), 2

R

Replay (class in elma.models), 5
right_wheel_position (elma.models.Frame attribute), 1
right_wheel_rotation (elma.models.Frame attribute), 2
RightVoltEvent (class in elma.models), 5
rotation (elma.models.Frame attribute), 1

S

sky_texture (elma.models.Level attribute), 3
spring_sound_effect_volume (elma.models.Frame attribute), 2
START (elma.models.Obj attribute), 3

T

time (elma.models.Event attribute), 1
TurnEvent (class in elma.models), 5

U

unpack_level() (in module elma.packing), 5
unpack_replay() (in module elma.packing), 5

X

x (elma.models.Point attribute), 4

Y

y (elma.models.Point attribute), 4
