
GitGate Documentation

Release 0.1

Aaron Meier

April 26, 2014

Contents:

Installation

```
sudo pip install gitgate
```

GitGate requires Flask, Python SQLite3, Peewee ORM, and ArgParse. These dependencies should automatically be resolved via PyPI.

2.1 Getting started

2.1.1 Setting up the repositories

```
git clone --bare https://github.com/yolo/swag.git tmp-swag.git
cd tmp-swag.git
git push --mirror https://github.com/yolo/swag-stable.git
cd ../
rm -rf tmp-swag.git
```
