Essential tools for TensorFlow model development and reuse

Guild AI is a toolset that provides helpful features for TensorFlow model developers:

- Automatically track training experiments
- Find and install trainable and fine-tunable models in seconds
- Create your own packaged models to share with the Guild community
- Seamless integration with TensorBoard for viewing training results
- Extend TensorBoard logs with detailed system metrics

Refer to [Guild AI's GitHub project](#) for the latest updates.

If you're interested in seeing Guild in action, read through the project's [User acceptance test](#), which demonstrates working functionality.

If you have any questions about the project, please [open an issue on GitHub](#).
