3	Email Setup	9
3.1	Default Email Settings	9
3.2	Mailjet Settings	9

Setup Guide and Documentation for the [Shopify App](#).

CHAPTER 1

Initial Setup

You'll need to setup both the WordPress plugin and the Shopify app. The WordPress plugin must be installed first.

Note: If you have any question about setting up the app, I would love to hear from you and be happy to help. Email kenton@shopifywishlistmember.com.

Setup WordPress Plugin

1. Install the [Link for Shopify and Wishlist Member](#) WordPress plugin. This should be done in the same way as you installed WishList Member. [Here](#) is a simple video tutorial. However, there are a few different ways to install a plugin, see WordPress' [Managing Plugins](#) page.
2. If you haven't already, setup a level in WishList Member by navigating to WishList Member -> Levels
3. Navigate to WishList Member -> Integration.
4. You'll see one of two things:
 - (a) If you've never setup a shopping cart before, then you'll see a list of shopping carts. Choose *Generic* and click *Update Shopping Carts*.
 - (b) If you've setup a shopping cart before, then you'll see a cog icon. Click the cog icon to bring up the list of carts. Choose *Generic* and click *Update Shopping Carts*.
5. After either 4a. or 4b. choose *Generic* from the dropdown and click *Set Shopping Cart*.

- 1ShoppingCart (Disabled)
- 2Checkout (Disabled)
- 2Checkout - Payment API (Disabled)
- Authorize.Net - Automatic Recurring Billing (Disabled)
- Authorize.Net - Simple Checkout (Disabled)
- ClickBank (Disabled)
- Cydec (Disabled)
- eWAY (Disabled)
- Infusionsoft (Disabled)
- JVZoo (Disabled)
- PayPal Payments Pro (Disabled)
- PayPal Express Checkout (Disabled)
- PayPal Payments Standard (Disabled)
- Pin Payments (Disabled)
- Premium Web Cart (Disabled)
- Recurly (Disabled)

The Membership Level SKUs specify the Membership Levels that should be connected to each transaction.

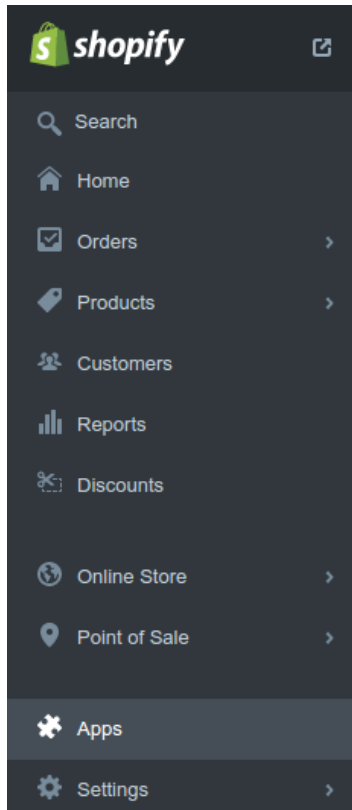

Congratulations

You've now completed the setup process for the WordPress Plugin. The next part will be easier.

Setup Shopify App

1. Install the [Shopify App](#). Once installed, you should be on the app home page. If not, navigate to Apps -> Link for Wishlist Member. You should now see:
2. Put in the URL of WordPress site eg `http://www.yoursite.com`. If you're unsure of the exact url, login to your WordPress site. You should be at a URL that ends in `wp-admin`. Put in the URL that you are on omitting the `wp-admin`. For example, if you are one `http://example.com/members/wp-admin` use the URL `http://example.com/members/`. You should now see a confirmation message.
3. You can now assign WishList Member levels to Shopify products using the drop down options. A customer who purchase the related Shopify Product will receive an email with an authenticated link that allows them to create a WishList Member account.

Assigning WishList Member levels to Shopify products is mostly straightforward, but for more detailed information see [Managing Levels](#).

Managing Levels

Walk Through

Let's say you want customers who purchase your Shopify product *Marble Wallet* to receive a *Gold* membership in WishList Member.

1. Select *Marble Wallet* from the first drop down.
2. Select *Gold* from the second drop down.
3. Click *Add*. You should see a confirmation message.

From now on, when a customer purchases a Marble Wallet, they will receive an email with an authenticated link. They can use new Wishlist Member account or login to an existing account.

Frequently Asked Questions

What

happens when

I click the 'Re-move' button beside a level?

Link for Wishlist Member and Shopify

Customers that purchase should get access to

Currently connected to your wordpress site

WordPress URL

The full URL to your WordPress site, eg http://www.your-membership-site.com

You should not update unless you've changed your WordPress URL

Future

cus-

tomers who purchase *Marble Wallet* will not get access to a *Gold* membership. However, customers who already purchased will retain access. If a customer purchased *Marble Wallet* but has not yet clicked the authenticated link, they will still be able to.

What if I want to delete a membership level in WishList Member?

You must first delete the relationship in Shopify. If you don't do this first, then your customers will still get an email asking them to login. If they already have an authenticated link to that level, they will see an error message letting them know that level is gone.

What happens if I update the name of a level in WishList Member?

Customers will get access to that new level.

Help! I accidentally deleted a level in WishList Member!

If you have any customers who have purchased a level, but not redeemed it, they will see an error message informing them that level has been deleted. For future customers, you'll need to setup the relationship again and remove the old one.

What do I do if I find a bug?

Email me and let me know.

I really need a new feature

This app is being actively developed and I'm looking for feedback. I'd love it if you emailed me to let me know.

Well what's your email then?

Kenton@shopifywishlistmember.com.

Is this app good?

Yes.

Default Email Settings

By default emails will be sent from *notifications@shopifywishlistmember.com* via Amazon's Simple Email Service. The email will look like:

Thank you for your order for Gold Membership. To access your product please click the link below.

<https://example.com/123>

Recipients can reply to your Shopify admin's email address.

Mailjet Settings

You can use this to send customized emails from your own domain using Mailjet. This will allow you to customize the design and the sending address of the email.

Warning: If you enable this, but do not correctly set it up, then your customers will not receive their registration emails.

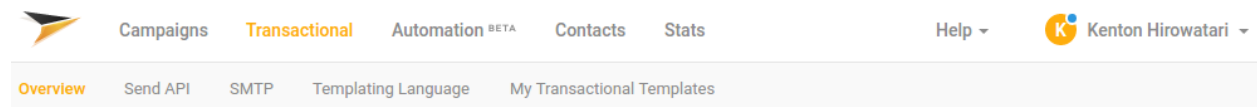

Note: This is an optional feature. If you do not activate it your clients will get our generic email with an authenticated link.

To setup Mailjet, perform the following.

1. Create an account with mailjet.com. You will be able to send up to 6000 emails/month for free.
2. Setup a transactional email template in Mailjet. There is [documentation on Mailjet](#) to guide you through this. You can use the following variable in your template:

Link for Wishlist Member and Shopify Documentation, Release 0.1

- (a) **Mandatory:** you must include a link in your email that contains `{{var:registration_link:""}}` so that the authenticated link is sent to the customer correctly.
 - (b) **Optional:** `{{var:first_name:""}}` can be used to include the client's name and `{{var:product_name:""}}` can be used to include the Shopify product name.
3. Setup the *Mailjet Settings* in *Link for Wishlist Member and Shopify*.
 - (a) Fill out the *API Public Key* and the *API Private Key* in *Link for Wishlist Member and Shopify* from the credentials in the [transactional tab](#) in Mailjet.

Transactional Emails

You can choose to send your transactional emails either through our [SMTP](#) relay or with our [Send API](#). If you need help choosing, find [more details in our API documentation](#).

Credentials	Configuration
<p>API Public Key (SMTP username)</p> <input type="text" value="abc123abc123abc123abc123abc123abc123"/>	<ul style="list-style-type: none"> Manage sender domains and addresses Authenticate my domains (SPF / DKIM) Manage API keys Configure event tracking
<p>API Secret Key (SMTP password)</p> <input type="text" value="123abc123abc123abc123abc123abc"/>	

- (a) Fill out the *From Address* in *Link for Wishlist Member and Shopify*. This must be setup as a [transactional email address](#) in Mailjet.
 - (b) Fill out the *Template ID* in *Link for Wishlist Member and Shopify*. To find this, in Mailjet go to the *Transactional* tab and choose the [My Transactional Templates](#) sub tab. Click on the desired template then copy the *Template ID* into your shopify app.
2. In *Link for Wishlist Member and Shopify* click *Save and switch to sending emails with Mailjet*.
 3. Send a test email to ensure that you set everything up correctly. This is very important because if you did not set things up correctly your customers will not receive their registration emails.

Note: If you have any question or feedback about the app, I would love to hear from you. Email kenton@shopifywishlistmember.com.
