
m1ch3l Documentation

Release 0.1

s. rannou <mxs@sbrk.org>

August 29, 2014

1	Contents	3
1.1	Configuration	3
1.2	First Start	3
1.3	Adding Custom Commands	3
1.4	Advanced Usage	3
1.5	FQA	3
2	Indices and tables	5

m1ch3l, also know as gorobot, is an IRC robot with the following features:

- support of multiple servers
- support of multiple channels
- support of private conversations
- flood control to be able to print pokemons in ASCII art without being G-lined
- administration commands via a dedicated set IRC channels (admin channels)
- JSON configuration
- external scripts that can be invoked via IRC (!commands)
- support of Docker

The official m1ch3l lurks in the shadows of freenode, but there are probably some others hanging around in the wild, we don't know how many.

Contents
