
newrelic-api Documentation

Release 1.0.5-dev

Micah Hausler

May 10, 2016

1	Currently Supported Resources	3
2	Internal resources	5

newrelic-api is a package for easily interacting with New Relic's API in a concise, pythonic way. For full documentation on each endpoint, please see [New Relic's API explorer](#). This is based off of the v2 API.
