This is the old, pre-Paver way of doing things. The key functionality here is in this powerful piece of code, which I will copy here in its entirety so that you can bask in its power:

```
def powerful_function_but_still_old():  
    """This is powerful stuff, but it's still the old way of  
    doing things."""  
    return 1+1
```
