# **Kaldi Python OnlineLatgenRecogniser wrapper Documentation**

*Release 0.1*

**2013-2014, UFAL-DSG, MFF, CUNI, CZ**

April 09, 2014

Pykaldi directory stores a Python Kaldi wrapper around C++ OnlineLatgenRecogniser. Currently, only OnlineLatgenRecogniser class from whole Kaldi library is interfaced to Python, but probably the support will be growing. Note that also OpenFST objects are interfaced through Python.
