pykids is a voluntary effort to bring Python to elementary school (5th & 6th grades).

- Our blog is publicly available at <http://hello.pykids.us/>.
- Students can sign up and start using the jupyter notebooks (Python3) hosted at our server. They can save their notebooks to reuse later.
- They can sign up for local classes/meetups for instructor based learning via the blog.

CHAPTER 1

What

- Scratch and turtle (K - 3)
 - Python lessons - Jupyter notebooks (5th & 6th grades)
1. Hello World python exercise
 2. Introduction to Jupyter notebook
 3. Calculator and simple math
 4. Creating name tags with strings
 5. Drawing
 6. Coloring grids
 7. Drawing graphs
- AWS Lab server that provides access to notebooks + Based on <http://coderdojotc.readthedocs.io/projects/python-minecraft/>

CHAPTER 2

How

All students need is a laptop and an internet connection. They can remotely access their notebooks and save their work to revisit later.

CHAPTER 3

Contribute

- Issue Tracker: github.com/mpant/pykids/issues
- Source Code: github.com/mpant/pykids

CHAPTER 4

Support

Volunteers needed to run local meetups/chapters!

CHAPTER 5

License

The project is licensed under the Apache2 license.

Python Community Code of Conduct

The Python community is made up of members from around the globe with a diverse set of skills, personalities, and experiences. It is through these differences that our community experiences great successes and continued growth. When you're working with members of the community, we encourage you to follow these guidelines which help steer our interactions and strive to keep Python a positive, successful, and growing community.

A member of the Python community is:

Open

Members of the community are open to collaboration, whether it's on PEPs, patches, problems, or otherwise. We're receptive to constructive comment and criticism, as the experiences and skill sets of other members contribute to the whole of our efforts. We're accepting of all who wish to take part in our activities, fostering an environment where anyone can participate and everyone can make a difference.

Considerate

Members of the community are considerate of their peers – other Python users. We're thoughtful when addressing the efforts of others, keeping in mind that often times the labor was completed simply for the good of the community. We're attentive in our communications, whether in person or online, and we're tactful when approaching differing views.

Respectful

Members of the community are respectful. We're respectful of others, their positions, their skills, their commitments, and their efforts. We're respectful of the volunteer efforts that permeate the Python community. We're respectful of the processes set forth in the community, and we work within them. When we disagree, we are courteous in raising our issues.

Overall, we're good to each other. We contribute to this community not because we have to, but because we want to. If we remember that, these guidelines will come naturally.
