**Release** 2.0.1

**Date** July 29, 2014

**Keywords** python, tts, speech, text2speech

**Author** Arezqui Belaid

**Description** Python wrapper for text-to-speech synthesis with Acapela

**Company** Developed by Star2Billing <http://www.star2billing.com>

Contents:

---

## Introduction

---

**Version** 2.0.1

**Date** July 29, 2014

**Keywords** python, tts, speech, text2speech

**Author** Arezqui Belaid

**Description** Python wrapper for text-to-speech synthesis with Acapela

**Company** Developed by Star2Billing <http://www.star2billing.com>

– Python-Acapela is a Python wrapper for text-to-speech synthesis with Acapela  
The license is MIT.

## 1.1 Overview

Python-acapela is a library to produce a text-to-speech file using ‘Acapela’\_ web services.

### 1.1.1 Example usage and output

After installation use Acapela in command line.

```
$ Usage: python-acapela -acclogin <accountlogin> -applogin <applicationlogin> -p <password> -t <text>
```

```
$ Output : Recorded TTS to /tmp/ACAPELA-8895934760117809679-ES.mp3
```

## 1.2 Documentation

Documentation is available on ‘Read the Docs’: <http://python-acapela.readthedocs.org>

## 1.3 Contributing

If you’ve found a bug, add a feature or improve python-acapela and think it is useful then please consider contributing. Patches, pull requests or just suggestions are always welcome!

Source code: <http://github.com/areski/python-acapela>

If you don't like Github and Git you're welcome to send regular patches.

Bug tracker: <http://github.com/areski/python-acapela/issues>

## 1.4 License

Copyright (c) 2012 Arezqui Belaid <[areski@gmail.com](mailto:areski@gmail.com)>

Python-Acapela is licensed under MIT, see *MIT-LICENSE.txt*.

---

## Installation overview

---

### 2.1 Installation

Install, upgrade and uninstall `python-acapela.py` with these commands:

```
$ sudo pip install python-acapela
$ sudo pip install --upgrade python-acapela
$ sudo pip uninstall python-acapela
```

Or if you don't have *pip*:

```
$ sudo easy_install python-acapela
```

---

## Resources

---

- [Feedback](#)
- [Extra information](#)
- [Source download](#)

### 3.1 Feedback

Your feedback is more than welcome. Write email to [areski@gmail.com](mailto:areski@gmail.com) or post bugs and feature requests on github:  
<http://github.com/areski/python-acapela/issues>

### 3.2 Extra information

Newfies-Dialer, an open source Auto Dialer software, uses this module to synthetize audio files being play to the end-user. Further information about Newfies-Dialer can be found at <http://www.newfies-dialer.org>

This module is built and supported by Star2Billing : <http://www.star2billing.com>

Similar library in Ruby : <https://github.com/mheld/acapela-ruby>

### 3.3 Source download

The source code is currently available on github. Fork away!
