S4: Student Signup for Service and Stuff Documentation

Release 1.0

Cal State Monterey Bay

Mar 25, 2017

Contents

S4 is a free software solution that allows your campus to track service-learning, internships, and undergraduate research experiences, as well as as teacher education and social work placements. S4 is uniquely designed to easily manage the CSU's risk management processes and provides students, faculty and community members with a user-friendly interface to manage CSU students' outside learning experiences.

This project is a collaboration between the CSUMB Web Services department and the Center for Community Engagement

For more information, visit the S4 project site.

Where'd all the docs go?

We've merged all our documentation into a single place at the Cal State S4 website.
