`timelog2csv` - converts a TimeLog calendar to a CSV file.

TimeLog was a time tracking application for OS X. It stored it's data using iCal. OS X Mountain Lion (and Mavericks) [dropped some features](#) that TimeLog needed to talk to iCal. So it's impossible to access the recorded data because the application won't even start.

But this small tool can help: Export the iCal calendar which you used to store TimeLog's data. Then use `timelog2csv` to convert it to a CSV file.

- [Free software: BSD license](#)
- [Documentation](#)
- [Repository](#)
- [Issue tracker](#)

Features

- Convert an iCal file to CSV
- Filter by project name

Installation

At the command line using `pip`:

```
$ pip install timelog2csv
```

Or, if you have `virtualenvwrapper` installed:

```
$ mkvirtualenv timelog2csv  
$ pip install timelog2csv
```

Usage

Run `timelog2csv` like so to see the help:

```
$ timelog2csv -h
```

4.1 Credits

4.1.1 Development Lead

- Markus Zapke-Gründemann <markus@keimlink.de>

4.1.2 Contributors

None yet. Why not be the first?

4.2 Changelog

4.2.1 0.1.2 (TODO)

- Added [drone.io](#) continuous integration service
- Added docs and tests to `MANIFEST.in`
- Added [bumpversion](#)
- Added [twine](#) to secure PyPI uploads

4.2.2 0.1.1 (2013-11-06)

- Fixed release date of 0.1.0.

4.2.3 0.1.0 (2013-11-06)

- First release on PyPI.
