1 Bank	3
2 Bank Account	5

The bank module defines the concept of bank and account.

CHAPTER 1

Bank

A bank links a party with a BIC.

CHAPTER 2

Bank Account

A bank account is defined by a *Bank* and at least one number.

- The *Bank* is the bank where the account is set.
- The *Owners* are the parties who own the account.
- The *Currency* is the default currency of the account.
- The *Numbers* are the different possible number that identifies the account. There are two types defined by default:
 - IBAN
 - Other
